StratuScape, Inc. Announces Preview Program Registration for StratuScape^(tm) Security Manager for Lotus

StratuScape to provide new security solutions for Lotus Domino
on IBM Mainframe and Enterprise Platforms.

SAN JOSE, Calif, December 8, 2009 - StratuScape Incorporated announced open registration for the upcoming StratuScape Security Manager for Lotus preview. StratuScape Security Manager is designed with the enterprise administrator in mind. Security Manager provides a framework for the management of security services, including Anti-virus, content filtering, and other security services.

Through this program customers will be able to participate in a preview of the upcoming product, providing feedback to the development team. Customers will also receive early access to the upcoming product release. Customer can sign up for the program at: http://www.stratuscape.com/preview.html

Provide Integrated Security Management, Anti-Virus, and Content Filtering Security Services

StratuScape Security Manager plans to include security services such as Anti-virus scanning, URL and content filtering engines. With Security Manager's focus on "open manageability" Security Manager will also provide the facility to manage other vendors ant-virus and content security security solutions to support heterogeneous enterprise computing environments. This approach affords customers greater visibility across their collaboration infrastructure.

Support zLinux, AIX and Linux Operating Environments

StratuScape Security Manager is focused an solving the needs of the enterprise customer. This means support for enterprise platforms is our first priority while designing a system that scales to meet enterprise security and manageability requirements. Both the management framework and content security engines will run on IBM System Z, and System P platforms.

Deliver End-to-end Collaboration Security for the IBM Lotus Platform

StratuScape Security Manager for Lotus plans to provide a single point of management for information security services across the range of Lotus collaboration products including Lotus Domino, Lotus SameTime, and Lotus QuickR.
